| TOPIC: FORENSICS REPORT - CASE RV07QS14RV0003 - LINE ITEMS 001-003 | | |

SYNOPSIS:

In August 2013, the National Center for Missing and Exploited Children (NCMEC) contacted the Riverside Sexual Assault Felony Enforcement (SAFE) Task Force with Cybercrime Tip # 2047698. The NCMEC referral indicated an individual using Internet Protocol (IP) address 142.136.82.105 and the email address "jcbuddy64@yahoo.com," had attempted to upload suspected child pornography (CP) content to a Dropbox. The account identification utilized to access the Dropbox account was jcbuddy64@yahoo.com.

On January 16, 2014, U.S. Immigration and Customs Enforcement (ICE), Homeland Security Investigations (HSI) Riverside agents and SAFE Task Force members executed federal search warrant ED14-0025M at the residence of HARPER.

This report will document the forensic findings of Computer Forensic Analyst (CFA) Reneau.

SYNOPSIS

In August 2013, the National Center for Missing and Exploited Children (NCMEC) contacted the Riverside Sexual Assault Felony Enforcement (SAFE) Task Force with Cybercrime Tip # 2047698. The NCMEC referral indicated an individual using Internet Protocol (IP) address 142.136.82.105 and the email address "jcbuddy64@yahoo.com," had attempted to upload suspected child pornography (CP) content to a Dropbox. The account identification utilized to access the Dropbox account was jcbuddy64@yahoo.com.

On September 17, 2013, Riverside Probation Officer J. Mellinger authored a search warrant to Time Warner Cable for the user information associated with the identified IP address. Time Warner responded identifying Angelo HARPER as the registrant.

Information contained within federal search warrant "ED14-0025M" identified the following information and suspected CP content as having been uploaded to the Dropbox servers by the user account jcbuddy@yahoo.com:

- a. Dropbox account identification number 184233476.
- b. Suspected CP image "bpm2 (1).jpg"
- c. Suspected CP image "Jun 18, 1 13 12 PM(1).jpg"
- d. Suspected CP image "Jun 18, 113 12 pm (2).jpg"
- e. IP address 142.136.82.105

On January 16, 2014, pursuant to federal search warrant ED14-0025M, U.S. Immigration and Customs Enforcement (ICE), Homeland Security Investigations (HSI) Riverside agents and SAFE Task Force members executed the federal search warrant at the residential address [REDACTED] Moreno Valley, California.

At the conclusion of the federal search warrant, computer forensics agent (CFA) special agent Tu Vo recommended three items for seizure. Line item 001 (Lacie External Hard Disk Drive SN# 1566130161380QR), line item 002, (Dell Computer Tower, Seagate HDD #5MT239VL, and line item 003, (Apple iPhone, SN DNPL2XXHF8GH) .

On January 21, 2014, CFA Dennis Reneau took possession of line items 001-003 as noted on DHS Forms 6051S (5570720, 5570523, and 5570521). All items were transported by government vehicle to the HSI Ventura Computer Forensics Laboratory in Camarillo, California, for analysis.

This report will document the forensic findings of line items 001-003 by CFA Reneau.

| REPORT NUMBER: 006 | |

CASE # RV07QS14RV0003
 CASE AGENT Dayna Roelfs, Special Agent
 Forensic Analyst Dennis Reneau
 Date Search Initiated January 21, 2014
 Forensic Lab Location ASAC Ventura, 770 Paseo Camarillo, Camarillo, CA
 Exam Authority Federal Warrant ED14-0025M

Alleged Violations Title 18 U.S.C. 2252A (a) (2) (Receipt or Distribution of Child Pornography), and Title 18 U.S.C. 2252A (a) (5) (B) (Possession of Child Pornography)

METHODOLOGY AND FORENSIC TOOLS

On January 21, 2014, CFA Reneau took possession of line items 001-003, as noted on DHS Forms 6051S (5570720, 5570523, and 5570521). All items were transported by government vehicle to the Computer Forensics Laboratory in Camarillo, California for analysis.

On this same date, CFA Reneau initiated a forensic examination of the seized devices in conjunction with the federal warrant.

The forensic tools EnCase version 6.19, AccessData's Registry Viewer, MiTEC's Registry Recovery tool, Internet Evidence Finder V6.2, IIEF Dropbox Decryptor, and Oxygen Forensics 2013 Analyst were utilized during the forensic examination of the seized items.

All programs utilized are commercially available and licensed by the Federal Government.

ITEMS SUBJECTED TO INVESTIGATIVE PREVIEW

Line Item 001
 Description: LACIE External 2TB HDD
 Model: GGED FW USB3
 Image Name: LINE_ITEM_001.E01

REPORT NUMBER: 006

accounts and Administrators accounts.

"Administrator" accounts are permitted to make system wide changes, install programs, and access all files on the computer. Users assigned to the administrator group have full access to other user accounts on the computer. User account "Nick" is a member of the Administrators group within line item 002.

User account "Nick" was the only non-default (user created) account within line item 002. All login activity for line item 002 was associated with the user account "Nick."

The System Account Manager (SAM) registry file was examined by CFA Reneau and determined to have one non-default user account. The name of the user account was "Nick" (NICK) with Security Identifier (SID)

S-1-5-21-329068152-1993962763-1606980848-1003.

The SAM registry hive is located at file path

"C:\Windows\System32\config\SAM." The SAM is a registry hive that contains hashed passwords, usernames, and associated SIDs.

A SID is a unique alphanumeric value utilized to identify a user, group, or computer account within the Windows environment. A SID on a local computer is generated by the Local Security Authority (LSA) when the account is first created. SIDs is used by the Access Control List (ACL) to determine if a user or group is allowed to perform various tasks and to identify file ownership. These tasks can include opening a file, opening a folder, and making changes to a particular file. There are no duplicate SIDs created for a single computer within a Windows environment.

| | REPORT NUMBER: 006 |

Initial assessment of the line item 002 HDD by CFA Reneau identified approximately 32 suspected CP images contained within a Windows zip file named "boyze.zip." The zip archive was located at file path "C:\Downloads\boyze.zip."

CFA Reneau previewed each of the 32 suspected CP images. Each of the images previewed were fully functional. A sampling of these items will be documented within the "Summary of Findings" section for line item 002.

To analyze the device, a forensic image of line item 002 was acquired and verified. Verification failed with no bad sectors identified. The forensic image was acquired using a SATA Tableau Write-Blocker, FTK Imager 3.0, and a government evidence drive to store the captured image.

Acquisition Hash: e1e9d349d8cff0c0d77e41e14cc27e56
Verification Hash: 029664777ce692888ecb795376cc7891

SUMMARY OF FINDINGS LINE ITEM 002

Video and image totals depicted below represent the totals located within line item 002. A file listing of the items identified as suspected CP will be provided to the case agent.

1. Line item 002 contained two suspected CP video files and two child erotica video files. All four of the video files were located within unallocated space.

Unallocated space is an area or space on a hard drive that is available to write data. Unallocated space is not viewable to a typical computer user and requires specialized forensic software to access and view the content.

Remnants within unallocated space include partially deleted files.

2. Line item 002 contained approximately 330 suspected CP images and approximately 100 child erotica images. Of this total, approximately 32 of the images were found within the allocated space. The remaining images were located within unallocated space and accessed once the drive was carved with EnCase.

3. Contained within the suspected CP images located in unallocated space were approximately eight images of what appear to be minor children under the age of two years old.

4. CFA Reneau submitted approximately 297 images located within the unallocated space to NCMEC, of which, 28 were listed as Identified Child, 228 were Recognized Hash Value, and 41 were Unrecognized Hash Value.

5. Approximately 32 images contained within the zip archive "boyze.zip"

| | REPORT NUMBER: 006 |

were submitted to NCMEC, with one listed as Identified Child and 21 were listed as Recognized Hash Values.

NCMEC DEFINITIONS

IDENTIFIED CHILD: These exact hash values are associated with an image/video which appears to depict at least one (1) child previously identified by law enforcement. Please be advised that these hash values may be associated with apparent child pornography images/videos as well as files that do not contain apparent child pornography.

RECOGNIZED HASH VALUES: These exact hash values are associated with files previously submitted to the National Center for Missing & Exploited Children (NCMEC's) Child Recognition and Identification System. However, NCMEC has no additional information regarding these files, which may or may not contain apparent child pornography or depict identified children. As a result, these hash values will not be listed in the pdf version of the NCMEC Initial Hash Value Comparison Report.

UNRECOGNIZED HASH VALUES: These exact hash values are associated with images/videos that have not yet been submitted to NCMEC's Child Recognition and Identification System.

6. EnCase keyword searches conducted against line item 002 revealed the prior existence of the file name "bpm2 (1).3gp" within the pagefile.sys. Image file "bpm2 (1).jpg was referenced within the federal search warrant ED14-0025M as a file that contained suspected CP content.

The pagefil.sys is used by the Windows operating system as virtual memory. When the applications running on the computer require more Random Access Memory (RAM) than what is installed in the device, Windows uses pagfil.sys as additional storage space.

7. An EnCase keyword search for IP address "142.136.82.105" identified in excess of 5000 hits for the exact IP address within line item 002. A sampling of the hits located are:

- a. freakshare.commc/142.136.82.105
- b. youtube.com%2Fvideoplayback %3Fip%3D142.136.82 .105
- c. http://engine.medialand.ru/test?extip=142.136.82.105
- d. _GPL.dc(9159, {"ccid": "Moreno Valley", "cid": "US", "ip": "142.136.82.105", "ppi": "0", "zoneid": 203 96, "rid": "CA"}
- 8. CFA Reneau identified one non-default user account within line item 002. The only non-default user account, "Nick," was associated with SID S-1-5-21-329068152-1993962763-1606980848-1003. The Relative Identifier (RID)

CASE NUMBER RV07QS14RV0003

REPORT NUMBER: 006

for user account "Nick" was "1003."

The last four numbers of the SID represent the RID. In the Windows environment, user or group accounts with a RID of 1000 or greater are assigned to accounts not created by default.

9. Located at file path, "C:\Downloads\boyze.zip," CFA Reneau located approximately 32 suspected CP images contained within a non-password protected Windows Zip file.

CFA Reneau conducted a file ownership and permission analysis of the Windows zip archive "boyze.zip" within EnCase. The owner SID was identified as SID S-1-5-21-329068152-1993962763-1606980848-1003.

10. Using EnCase, a search of the unallocated space was conducted for CP content. CFA Reneau located approximately 300 suspected CP images. These images have been provided to the case agent and NCMEC for additional analysis.

11. Located at file path "C:\Documents and Settings\Nick\My Documents\college\Application Essay.doc," CFA Reneau identified a document entitled "Application Essay by Angelo Harper." The document appears to have been written from the vantage point of "Angelo Harper" and addressed to the Art Institute of California.

Additional personal documents were located within the file path "C:\Documents and Settings\Nick\My Documents" including, "Letter of

12. In examining line item 002, CFA Reneau identified an active installation of Dropbox located at file path, "C\Documents and Settings\Nick\Application Data\Dropbox\bin\Dropbox.exe."

Dropbox is a free and paid file hosting service which allows a user to access his or her files from any computer connected to the internet. Dropbox requires users to provide basic identifying information which includes a functioning email address at the time of registration.

13. Information contained within federal search warrant ED14-0025M referenced NCMEC referral #2047698. This referral identified email address "jcbuddy64@yahoo.com" in association with Dropbox account "184233476" and the transmission of suspected CP content.

In examining line item 002, CFA Reneau conducted keyword searches for email address "jcbuddy64@yahoo.com." Located within the "config.db" database for the software application Dropbox, CFA Reneau noted the Dropbox registrant email address of "jcbuddy64@yahoo.com." The account number identified was "237587201."

| | REPORT NUMBER: 006 |

The Dropbox file "config.db" is used to store the Dropbox application and configuration settings. The configuration database is located at file path "C:\Documents and Settings\Nick\Application Data\Dropbox," and had an MD5 hash value of "c0563d2923c0630215147dbae564f7ab."

14. Utilizing a hash list created from the content in the Dropbox Search Warrant response, CFA Reneau identified approximately 297 hash matches for items carved from the unallocated space of line item 002. There were zero hash matches for the suspected CP items located within the zip archive.

15. Utilizing the forensics tool Internet Evidence Finder (IEF), CFA Reneau decrypted the native Dropbox database "filecache.db." The database is encrypted by the application, not the user.

The "filecache.db" is used by Dropbox to identify the files actively stored on the Dropbox server and associated with the user account storing the database. Located within the Dropbox database, "filecache.db," CFR Reneau identified approximately 690 file listings. The list, in its entirety, will be provided to the case agent. The following is a sample of the file listings located within line item 002.

The file path was taken from the column "server_path" of the "filecache.db" database. The number "237587201" references the Dropbox account ID associated with the Dropbox account.

 16. CFA Reneau identified the five most recently changed files associated with Dropbox account ID "237587201." The file listing is created and stored by Dropbox to the internal database file "config.db." These files represent files that were removed or deleted from Dropbox.

The files identified were:

a. /Stuff/vids/Brazil boy 1 Videos What You See Is Nothing.flv;
 b. /Stuff/vids/AMATEUR CHUBBY.flv;
 c. /Stuff/vids/_CHUB_TOO_HARD!!!new_ - teenboys.flv;
 d. /Stuff/vids/_[SOLO] 12yo UGA (sound) - My-First-Time.flv;
 e. /Stuff/vids/_[HOT] E3-1 (super detailed !!).AVI
 17. Located within line item 002, CFA Reneau identified an active installation of the Peer-to-Peer software Frostwire. Analysis of the "frostwire.props" file revealed the chat name of "jcbuddy64." The Frostwire logs and directories were negative for suspected CP content.
 18. Located at file path "C:\Documents and Settings\Nick\Application Data\Skype\jcbuddy64\main.db," CFA Reneau identified file remnants of the SKYPE application and the user profile "jcbuddy64."

SKYPE is a voice-over-IP service and instant messaging client, currently developed by the Microsoft Skype Division. The SKYPE application permits the sharing of image and video files through the instant messaging client. The configuration settings of the SKYPE application listed a user created full name of "Bobby" and an associated email account of jcbuddy64@yahoo.com.

19. Analyzing the SKYPE contacts located within the "main.db" database file of SKYPE, CFA Reneau identified the contact "Siri.danielsen1." According to the "main.db" database, this contact was last online on 01/19/2013 at 07:07:51 PM.
 20. Utilizing IEF, CFA Reneau identified approximately 100 file transfers between user "jcbuddy64" and "siri.danielsen1" with the application SKYPE.

siri.danielsen1/ Siri Danielsen
 do you have a good speed?

jcbuddy64/ Bobby
 not really. but its just i got to be careful around others <ss
 type="wink"> ;) </ss>
 Message Sent: 01/18/2013 05:56:07 PM

siri.danielsen1/ Siri Danielsen
 is it safe for me to send? How old are you...

jcbuddy64/ Bobby
 im 17. a senior in high school

siri.danielsen1/ Siri Danielsen
 ok

jcbuddy64/ Bobby
 yeah u can send if u want. how old r u?

siri.danielsen1/ Siri Danielsen

Is 49meg to big?

siri.danielsen1/ Siri Danielsen
38

jcbuddy64/ Bobby oh wow.
cool lol

siri.danielsen1/ Siri Danielsen
Want be to send a 49mb file

jcbuddy64/ Bobby
49 is fine

siri.danielsen1/ Siri Danielsen
p101-USboys_01_Brotherlove.mpg

siri.danielsen1/ Siri Danielsen
A friend wil come over in max 30 minutes. So i only can do this until then,

siri.danielsen1/ Siri Danielsen
You have to acsept file

siri.danielsen1/ Siri Danielsen
Just be careful. Take your time.

jcbuddy64/ Bobby
ok. think u can also send pics & vids via email?

jcbuddy64/ Bobby
i will

jcbuddy64/ Bobby
did u send any?

siri.danielsen1/ Siri Danielsen
yes. you have to acsept

jcbuddy64/ Bobby
u still there?

jcbuddy64/ Bobby
i didn't get anything

siri.danielsen1/ Siri Danielsen

siri.danielsen1/ Siri Danielsen
You in usa. here it's 19.07

jcbuddy64/ Bobby
yeah its 10 in the morning here

siri.danielsen1/ Siri Danielsen
<ss type="smile">:)</ss>

jcbuddy64/ Bobby
so where do u get your pics from?
siri.danielsen1/ Siri Danielsen
Around Seattle?

siri.danielsen1/ Siri Danielsen
I have been there many times <ss type="tongueout">:P</ss>

jcbuddy64/ Bobby
california

siri.danielsen1/ Siri Danielsen
Why you like them so young...I like 8 to 14 the best.

jcbuddy64/ Bobby
yeah

jcbuddy64/ Bobby
think u can emai more infant/toddlwr pics

jcbuddy64/ Bobby
idk. i just like babies - 10 the most, but ive never seen many baby pics
though

siri.danielsen1/ Siri Danielsen
ok. Like i told you I have so many pics i need time to find them. I made a
toddler folder and i moved 50 pics there so fare just for you <ss
type="tongueout">:P</ss>

jcbuddy64/ Bobby
<ss type="laugh">:D</ss>

jcbuddy64/ Bobby can u email it?

siri.danielsen1/ Siri Danielsen

You are the first i chat with that have same intrest as me. I am very scared about this. We have to be careful. I dont like that you do this at school.

siri.danielsen1/ Siri Danielsen

They monitor some of the trafick.

siri.danielsen1/ Siri Danielsen

It's safer to trade when you are home.

jcbuddy64/ Bobby

but im using my phone. ive done this many times, its safe here too <ss type="wink"> ;) </ss>

siri.danielsen1/ Siri Danielsen

But so slow. To send the 49 mb file wil take 3 days

siri.danielsen1/ Siri Danielsen

I send 10mbps

jcbuddy64/ Bobby <ss type="sad"> :(</ss> what is it of?

siri.danielsen1/ Siri Danielsen

but my poo video is HUGE

jcbuddy64/ Bobby

oh, you found a poo video <ss type="laugh"> :D </ss>

siri.danielsen1/ Siri Danielsen

From a 12 y old boy i knew.

jcbuddy64/ Bobby

oh, your video is of poo <ss type="surprised"> :O </ss>

jcbuddy64/ Bobby

what happens in it?

siri.danielsen1/ Siri Danielsen

Its so hard to find <ss type="sad"> :(</ss>

siri.danielsen1/ Siri Danielsen

he takes a dump....

jcbuddy64/ Bobby

so u can see the poo coming out

=====END SAMPLE SKYPE CHAT=====

24. A link file analysis was conducted on line item 002 revealing access to files of a possible suspected CP nature. The link files were located within the file path "C:\Documents and Settings\Nick\Application Data\Real\RealPlayer\History." A sample of the Windows LNK files are:

a. 12yo US boy squirts cum and pee at sa....lnk

b. 12((hussyfan))lada_9yr_fuck_on_bed.lnk

c. 3 boys playing.lnk

d. man fucks boy like dog on bed.lnk

e. 050909K 9yo boy gives much older brot....lnk

f. Bibcam 12Yo Konrad & 6Yo Boylover - m....lnk

25. Analysis of line item 002 revealed the installation of client-based email application Outlook. The application was located at file path "C:\Program Files\Microsoft Office\OFFICE11\OUTLOOK.EXE."

EnCase keyword searches conducted across line item 002 revealed the use of Internet based email account "jcbuddy64@yahoo.com" by a user of this device.

26. A check within the program files of line item 002 revealed the presence of anti-virus software AVG10.

Line Item 003
 Description: APPLE iPhone
 Model: iPhone 5.2
 Image Name: Apple_iPhone 5 CDMA.udf
 Write-Blocker: UFED
 File System: CDMA
 Serial Number (S/N): DNPL2XXHF8GH
 IMSI: 310120005370165
 Time Zone: America/Los Angeles
 Phone Number: (951) 378-5904
 iTunes Display Name: AJ's
 Jail Break: No

EXAMINATION PREVIEW NOTE

Initial assessment of line item 003 was conducted by placing the cellular device into a Faraday box and placing the cellular device into airplane mode. The Faraday box was utilized to restrict any network connectivity prior to the device being placed in airplane mode.

Once the device was placed in airplane mode, a forensic image was created using Cellebrite UFED. In addition, the device was analyzed using Oxygen Forensics 2013 Analyst.

SUMMARY OF FINDINGS LINE ITEM 003

Video and image totals depicted below represent the totals located within line item 003. A file listing of the items identified as suspected CP has been provided to the case agent.

1. At the time of analysis, the device was password protected with the password "4363," which was provided by the case agent.
2. CFA Reneau identified approximately 50 suspected CP files located within the unallocated space of line item 003.
3. Analysis of the cellular device identified several email accounts including "ajharper18@gmail.com" and "angelo.harper18@yahoo.com."
4. Line item 003 contained an active installation of Dropbox associated with the user ID "ajharper18@yahoo.com" and display name "Bobby J."
5. The cellular number for the minor contact (M1) was listed as:
 - a. Dad [REDACTED]
 - b. Mom [REDACTED]
 - c. Frances [REDACTED]
 - d. Home [REDACTED]
 - e. Other [REDACTED]
 - f. iPod [REDACTED]

CASE NUMBER RV07QS14RV0003

REPORT NUMBER: 006

g. Street [REDACTED]

h. City Mo [REDACTED]

6. In reviewing the message log of line item 003, CFA Reneau identified a contact listed as "JC" with the nickname "Buddy" (M1). There were approximately 1,070 messages located between a user of line item 003 and M1.

7. On 10/18/2003 at 8:21 PM, a user of line item 003 sent a text message to M1 indicating "my mom said you go to the school she works at."

8. Located on the device were approximately five, non-CP images of M1. The images include images which appear to have been taken in an elementary school classroom environment.

9. Line item 003 contained approximately 8 images of unknown children taken in an elementary school classroom (non-CP or erotica).

10. Data contained within line item 003 including message chats, contact lists, and images has been provided to the case agent.

11. Utilizing a hash list created from the content in the Dropbox search warrant response, CFA Reneau identified two hash matches for items carved from the unallocated space of line item 003.

This investigation continues.
